

# Backend Software Engineer

Are you the software engineer that makes our customer's data dreams come true?

We are Axual, a fresh startup on a mission. A mission to unleash the power of information within large organizations, in real-time. We enable them to respond instantly to their customers' ever-changing needs.

How? We provide them with real-time data solutions. And we provide the tools and services to administer their business data streams easily and reliably. Customers love us, because we make their real-time data dreams come true.

We are looking for engineers to help us on our mission. You'll love working with us if you:

- are a free-spirited individual
- like to challenge the established order using cutting edge technologies
- realize that a client's mind changes from time to time; requirements are not set in stone, just like you
- want the client to be self-supporting
- have a product development mindset. Improving "your" product makes you proud.

Responsibilities:

You will be developing features and related software components that make our solutions stable and secure, easy to use and easy to monitor. You will help clients connect their existing data sources to the platform and develop state-of-the-art streaming applications. As a subject matter expert you don't mind sharing your knowledge and insights during development cycles, or even during training sessions for clients. You will be using the latest in open source technologies. And of course you'll be working in an agile environment.

We are looking for a data-savvy software engineer with :

- 3+ years of experience in Java application development in a professional (enterprise) environment (Java 8 at a minimum, Scala experience would be great)
- Strong connection with Apache stream processing tools and frameworks, such as Kafka, Kafka Streams or even some experience with Flink, Spark, Storm
- Experience with Maven, Git, CI, Docker, Jenkins and/or Gitlab
- Experience using the Spring framework
- Some experience using Linux and bash/python scripting is beneficial

What we offer:

- a company that you can help build from the ground up
- a team that you'll love working with every day
- an immensely fast and dynamic market to work in
- great clients to work with and for
- a salary suitable for someone with your knowledge and expertise
- a brand new Macbook Pro
- a nice place to work in the heart of Utrecht
- great coffee

Do you want to join us on our mission? Do you want to know more? Let's get in touch.
